ABOUT

Aspiring Full Stack Developer with hands-on experience in JavaScript, React.js, and MERN stack. Skilled in developing responsive web applications, integrating REST APIs, and implementing authentication. Strong foundation in modern JavaScript and React.js, with basic knowledge of Next.js and a strong interest in modern full-stack development.

SKILLS

- **Programming Languages:** JavaScript , Java , C , TypeScript (Basic)
- **Frontend Technologies:** React.js , Next.js (Basic), HTML, CSS , Tailwind(basic)
- **Backend Technologies:** Node.js/Express.js , Spring Boot, REST APIs , JDBC
- **Database:** MongoDB , MySQL
- **Version Control & Tools:** Git, GitHub

EDUCATION

- Computer Engineering — R. C. Patel Institute of Technology, Shirpur — CGPA: 8.51
- 12th — D. N. C. College, Jalgaon — 61.33% — 2023

PROJECTS

- **ChitChat — Real-Time Chat Application** — [GitHub](#) — [Live Demo](#)
Developed a real-time chat application using React.js, Node.js, Express.js, and Socket.IO for instant message communication. Implemented REST APIs for message management and built a responsive frontend with React, JavaScript, HTML, and CSS.
- **Contact Manager — Next.js Application** — [GitHub](#)
Developed a contact management application using Next.js, TypeScript, and React, implementing contact listing, creation, editing, and deletion through reusable components. Utilized Next.js App Router for page routing, server actions, and API routes for contact operations, and implemented basic authentication functionality.
- **MERN Stack JWT Authentication App** — [GitHub](#) — [Live Demo](#)
Developed a full-stack authentication application using React.js, Node.js, Express.js, and MongoDB. Implemented JWT-based authentication, bcrypt password hashing, protected routes, token persistence, and frontend/backend validation using Joi.
- **FleetBridge — Fleet Management System**
Developed a full-stack fleet management platform with an Angular and TypeScript-based web portal and Java backend services. Built a web-based dashboard for fleet operations, supported server-side business logic and API services, and worked with deployment and automation scripts for application build and deployment.

PARTICIPATIONS

- Completed the **30 Days of JavaScript** Challenge on LeetCode, strengthening JavaScript and problem-solving skills.
- Successfully participated in the **24-Hour Code4EdTech Hack-A-Thon 2025**, demonstrating problem-solving, teamwork, and rapid prototyping skills.
